STANDARD OPERATING PROCEDURE

Warranty Claims SOP

Document number	LHS-SOP-TS-007
Revision	4.0
Effective date	February 16, 2026
Document owner	Technical Support (Tier 2)
Audience	Technical Support agents, Warranty Supervisors, Customer Care Team Leads
Classification	Internal - do not distribute outside Lumora

Purpose. Defines how warranty claims are verified, approved and fulfilled for Lumora devices after the 30-day return window. Coverage terms themselves are defined in the Lumora Limited Warranty Policy (LHS-POL-001); if this SOP and the policy disagree, the policy prevails.

1. Scope

This SOP applies to claims for hardware defects reported more than 30 days after delivery and within the warranty period. Problems reported within 30 days of delivery are handled as defective returns under the Returns and Refunds SOP (LHS-SOP-CC-004), unless the customer prefers a replacement. Units reported dead on arrival within 14 days of delivery are handled as DOA RMAs (see LHS-SOP-OPS-011).

2. Warranty Periods Quick Reference

Product	Standard term	Notes
Thermostat T2	24 months	No extension for professional installation.
Thermostat T3	36 months	Can be extended to 48 months; see policy section 5.
Room Sensor S1	12 months	Battery not covered.
Hub H1	24 months	
Power Extender Kit PEK-1	12 months	
Certified Refurbished units	12 months (S1: 6 months)	Regardless of model.

Table 2-1. Warranty terms (summary of LHS-POL-001).

3. Claim Intake

1. Verify the customer's identity and open or link a LumoraDesk ticket.
2. Record the serial number from the app (Device > About) or from the label on the back of the device. Serial numbers start with the model prefix, for example T3B for Thermostat T3

hardware revision B.

3. Confirm that the device is within the warranty period. The warranty start date is the delivery date registered for the serial number.
4. If the serial number is not registered to the customer's account, request proof of purchase: an order number or a receipt showing the purchase date and an authorized retailer.
5. Confirm and record the troubleshooting performed. At minimum: a power-cycle, a firmware version check, and the model-specific steps in the product guide.
6. For any report of physical damage, request at least two photos of the device and its wiring.
7. Check the claim against the exclusions in policy section 4. If an exclusion applies, follow section 6 (denied claims).

> **Important:** Do not ask the customer to open the device or remove the T3 battery. Opening the device is not required for any claim and may create a safety risk.

4. Approval Rules

Tier 2 agents may approve warranty claims that meet all intake requirements. Each customer account may have up to two approved warranty claims in any rolling 12-month period. A third claim within 12 months must be reviewed by a Warranty Supervisor before approval, because repeated claims can indicate an installation problem or abuse of the program.

The claim decision must be communicated to the customer within 2 business days of receiving complete documentation. Use the email templates WC-APPROVED or WC-DENIED in LumoraDesk. Claims for devices bought from unauthorized resellers (including online marketplace sellers not listed on the Lumora website) are denied.

5. Fulfilment Options

5.1 Standard Replacement

The customer ships the defective unit to the RPC using an RMA of type WAR. A replacement ships within 2 business days after the RPC confirms receipt. The replacement may be new or Certified Refurbished and is covered for the remainder of the original warranty or 90 days, whichever is longer.

5.2 Advance Replacement

With advance replacement, the replacement ships before the defective unit is returned. Advance replacement is offered to all customers for the Thermostat T3 and the Hub H1, and for any device when the customer has an active Lumora Plus subscription. It is not offered for the T2 or S1 to customers without Lumora Plus. To start an advance replacement, create an RMA of type ADV and place a card authorization hold equal to the current list price of the device. The hold is released when the RPC receives the defective unit. If the defective unit is not received within 21 days of the replacement delivery, the customer's card is charged the full list price and the RMA is closed as unreturned.

5.3 Refund Instead of Replacement

If a replacement cannot be shipped within 10 business days because of stock shortages, the agent may offer a refund of the original purchase price as an alternative. Refunds in lieu of replacement up to $250 may be approved by Tier 2; higher amounts follow the refund approval matrix in LHS-SOP-CC-004.

Option	Who qualifies	Customer pays shipping	Typical time to replacement
Standard replacement	All valid claims	No	5-7 business days
Advance replacement	T3 and H1 (all customers); any device with Lumora Plus	No	2-3 business days
Refund in lieu	Replacement out of stock for more than 10 business days	No	Not applicable

Table 5-1. Fulfilment options.

6. Denied Claims and Appeals

When a claim is denied, the agent must state the specific exclusion from the policy in the WC-DENIED email. Customers may appeal within 30 days of the decision by replying to the email. A Warranty Supervisor reviews the appeal and responds within 5 business days. A second appeal is not available.

7. Out-of-Warranty Requests

If the device is no more than 90 days past the end of its warranty, the agent may offer a one-time loyalty discount of 30% on a new replacement unit using discount code type LOYAL-30. Devices more than 90 days out of warranty are not eligible for the discount; the customer may buy a replacement at the normal price.

8. Common Claim Scenarios

The table below gives the expected decision for situations that agents ask about most often. When a case does not match any scenario, ask a Warranty Supervisor before deciding.

Scenario	Decision	Reason / next step
T3 shows E4 after a power-cycle, 20 months after delivery	Approve	Humidity sensor fault, within the 36-month term.
T2 display failed 26 months after delivery	Deny	Outside the 24-month T2 term; offer LOYAL-30 if within 90 days.
T3 battery holds only a few minutes, 14 months after delivery	Deny	T3 battery coverage is 12 months (policy section 1).
Terminals melted after the customer wired the T2 to a baseboard heater	Deny	Line-voltage exclusion; treat as a safety case first.
S1 bought from a marketplace seller not listed as authorized	Deny	Unauthorized reseller exclusion.
H1 solid red light returns after a power-cycle	Approve	Confirmed hardware fault; advance replacement available.
Third claim on the same account in 10 months	Hold	Warranty Supervisor review required (section 4).

Table 8-1. Claim scenarios and expected decisions.

8.1 Claim Checklist

- Serial number recorded and matches the account or proof of purchase
- Warranty start date and end date confirmed
- Troubleshooting documented, including the firmware version
- Photos attached for any physical damage
- Exclusions checked and decision recorded with the template name
- RMA created with the correct type (WAR or ADV) and linked to the ticket

9. Records

- Every claim, approved or denied, must be logged with the serial number, warranty start date, troubleshooting performed and decision.

- Photos and proof of purchase are attached to the LumoraDesk ticket, not sent by personal email.
- Warranty Supervisors review a weekly report of accounts with two or more claims in 12 months.

10. Fraud Indicators

Most claims are genuine. The indicators below do not justify a denial on their own, but any claim with two or more of them must be reviewed by a Warranty Supervisor before approval:

- The serial number was registered to a different account in the last 90 days.
- The shipping address for the replacement differs from the address where the device is registered.
- The customer asks for advance replacement and refuses a card authorization hold.
- Photos show a device of a different model or hardware revision than the serial number.
- The account has a chargeback or a flagged return in the last 12 months.

11. Communicating Decisions

Decision emails are sent from LumoraDesk using the approved templates. Agents may add a personal sentence but must not change the policy wording. The WC-APPROVED template includes the RMA number, the fulfilment option and the shipping deadline for the defective unit. The WC-DENIED template includes the exclusion that applies, the appeal process in section 6 and, where eligible, the LOYAL-30 offer in section 7.

If the customer disagrees on a call, explain the reason calmly, offer the appeal process, and do not promise a different outcome. Agents may not approve a denied claim as a goodwill gesture; goodwill credits follow the Ticket Escalation SOP.
